

Editorial Notes

Editorial Board

Welcome to the second issue of the second volume of the International Journal of Hidden Data Mining and Scientific Knowledge Discovery. We have almost completed the second volume and still look for original submissions and works.

We are trying to improve the quality of the papers that are published with a more consistent review process. Authors are encouraged to submit their latest research results to the HDSKD journal: Hidden data mining and scientific knowledge discovery (*a peer reviewed journal*).

As usually, the criteria of selection are based on the review decision, which will lead to the acceptance or reject of the paper.

We also recall that there is no publication charge for authors and no subscription fees for the readers. The journal is a non-profit academic source of knowledge and does not permit any commercial use of the articles.

Respectfully
The Editorial Board
