

## Editorial Notes

The HDSKD journal began its first issue in 2015. At that time we did not know whether it will succeed or not, but we decided to go ahead and now – in 2022 – it still exists.

So, we are happy to see that our journal is still publishing even though there is no financial support to this scientific work.

Many thanks to all the editorial team and reviewers who have hardly collaborated during the review process and who help us to continue managing the journal.

At present, we are looking for new original submissions and works to include in the next eighth volume!

So, authors are strongly encouraged to submit their latest research results to the HDSKD journal: Hidden data mining and scientific knowledge discovery.

Once the paper is reviewed, the criteria of selection are mainly based on the review reports, which will lead to the acceptance or rejection of the scientific submission. The accepted formats are MS Word and PDF.

Once again, we recall that the journal represents a non-profit academic source of knowledge and does not charge any publication fee.

Respectfully  
The Editorial Board
