

Editorial Notes

Editorial Board

Welcome again to the second volume of the International Journal of Hidden Data Mining and Scientific Knowledge Discovery. We have moved on, now, to the second volume and we still express a great motivation in this publishing work.

The journal could represent a real key for the researchers to present their results or to get the comments of the expert readers and reviewers. The journal still tries to improve the quality of the papers that are published with a more consistent review process.

Once again, authors are encouraged to submit their latest research results to the HDSKD journal.

As Editors, we are happy to announce the opening of our second volume in hidden data mining and scientific knowledge discovery (*a peer reviewed journal*) and encourage authors to submit their latest research results to the HDSKD journal.

Obviously, the criteria of selection are based on the review decision, which will lead to the acceptance or reject of the paper.

Finally, let us recall that the journal is a non-profit academic source of knowledge and does not permit any commercial use of the articles. Furthermore, there is no publication charge for authors and no subscription fees for the readers.
